sounds good, thanks.

I'm actually writing the story on Friday. if I need to reach you then for clarification of something and to make sure I don't screw anything up, is there a cell phone I can reach you at ?

DF

Thanks, Dan. You can attribute statement to me, yes. I should be available tomorrow; have an event Friday that will take up much of day.

EPA's draft report is based on an assessment of data from Pavillion-area wells and outlines preliminary findings based on that data. EPA also recognizes the value of further sampling of deep monitoring wells and believes that additional data will strengthen our understanding of what is occurring in Pavillion. Additional data is now being collected from monitoring wells in coordination with the U.S. Geological Survey, the Northern Arapaho and Eastern Shoshone tribes, and the State of Wyoming. The draft report, along with this additional data, will be open for public comment through October of this year. After the public comment period, a peer review of the draft report will be led by a panel of independent scientists.

also, will likely have some follow ups on the report, which I'll need to go over with you tomorrow or Friday (traveling Thursday).

will you be around?

best,

df

Subject: RE: Question

Dan, thanks. We are in the midst of a public comment period on the draft report we issued last December. As such, we are primarily referring folks to the report and information on our website: <http://www.epa.gov/region8/superfund/wy/pavillion/>

I have a statement, below, which we have been using as an update. Also, I can help clarify facts on background.

EPA's draft report is based on an assessment of data from Pavillion-area wells and outlines preliminary findings based on that data. EPA also recognizes the value of further sampling of deep monitoring wells and believes that additional data will strengthen our understanding of what is occurring in Pavillion. Additional data is now being collected from monitoring wells in coordination with the U.S. Geological Survey, the Northern Arapaho and Eastern Shoshone tribes, and the State of Wyoming. The draft report, along with this additional data, will be open for public comment through October of this year. After the public comment period, a peer review of the draft report will be led by a panel of independent scientists.

Hi Rich--

Just wanted to get some basic info on EPA's involvement in the situation in Pavillion, which I know has been going on for a while.

I'm happy to speak around 4:15 if that works? Or we could chat tomorrow morning.

I'm in touch with the Wyoming state folks.

Let me know what works in terms of timing from your end.

Thanks very much.

Dan

Hi Dan-- can you let me know what you need clarification on? I'm in a training session til 4pm but can try and connect with folks via email. The meeting in Pavillion this week is being coordinated by the Wyoming Water Development Commission.  
<http://wwdc.state.wy.us/> EPA will be in attendance.

Hi Rich--

Dan Frosch with the New York Times here.

Can you give me a call when you have a quick second?

Doing a story on this public meeting in Pavillions, Wyoming on Thursday and wanted to touch base to get some basic information.

Thanks very much.

Dan
